## Air Guns Pellets

APOLO air gun pellets, is a company exclusively specialized in the manufacture of small bullets with the latest European technology. The company's aim is to offer the best pellets quality in the market.

The pellets are made with raw material, nonrecycled lead. The flexible company organization allows it to make different types of pellets that could be adapted to the client requirements: specific details and uses of each country.

The company has a design department where the client could order the design of a logo, mark and labels to sell the pellets under an own business line. The packaging is available in plastic or cardboard boxes.

## Point

Cal. .22 (5,5 mm)  
 Cal. .177 (4,5 mm)
